- Vendor table — 3' x 6' (valued at \$150 per table)

Governments are just starting to realize the power of data visualization and analytics. To address the growing needs of governments around data visualization and analytics maturity, the Carl Vinson Institute of Government established the Georgia Data Innovation Hub (Data Hub).

The Data Hub provides training and learning opportunities around data analytics, data visualization, and predictive analytics to government employees. The Data Hub supports governments in building data analytics capabilities through shared expertise and innovation. With the right tools and skills, government leaders are able to leverage data to make better data-informed decisions.

The Georgia Data Innovation Hub is hosting the Second Developing Data Analytics Capabilities Conference March, 27–28, 2024. This year the conference will include three pre-conference workshops on March 26th. The audience includes

state and local governments, higher education institutions, and school systems.

Hosted at the University of Georgia's Center for Continuing Education and Hotel, the conference will include keynote and plenary sessions on generative AI and its impact on government and breakout sessions focused on topics in data analytics for both technical and program-level audiences. The 2024 conference will also host the graduation of the first cohort of the Data Analytics and Decision Making for Government Certificate program.

Event sponsors will reach practitioners and leaders in key sectors across the state who are working to mature their organization's data analytics capabilities.

To be featured at the 2024 Developing Data Analytics Capabilities Conference, please contact Kathryn Reeves McHugh at (706) 542-8883 or kathryn.reeves25@uga.edu.

ABOUT CARL VINSON INSTITUTE OF GOVERNMENT

As a Public Service and Outreach unit of the University of Georgia, the Institute of Government shares in the University's overarching public service mission of extending our resources of professional knowledge and expertise to help build better communities and improve lives.

At the Institute of Government, we inform, inspire, and innovate so that governments can be more efficient and responsive to citizens, address current and emerging challenges, and serve the public with excellence.

The Institute of Government empowers citizens and governments by providing innovative resources and tools that build stronger communities, inspire economic success, and improve quality of life throughout the state of Georgia and beyond.

The Georgia Data Innovation Hub's mission is to convene, train, and provide technical assistance to raise the capabilities of government employees doing data analytics, data visualization, and predictive analytics.
